Get Technologies

WHY... GET-LITE?

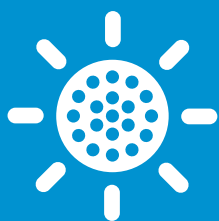

Get-Lite is providing optimum commercial, industrial and residential lighting solutions with exceptional service and backup support. Get-Lite is an innovator and leader in LED lighting in Pakistan with highest international standards / certifications. Using state of the art Get-Lite designs and produces the most advanced LED Lights & Fixtures in the market today.

We stand behind our products with substantial warranties, offers unmatched protection against the rigors of outdoor exposure.

Get-Lite is committed to delivering the best solutions on the market, inspired by the needs of our customers and perfected by the knowledge and expertise of our engineers. We recognize the importance of beautiful energy-efficient lighting and aspire to improve every business with uncompromising performance and payback.

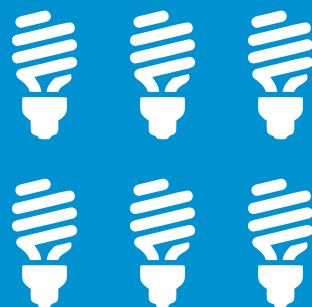

LED has changed the way the world sees light. Inefficient, old-style incandescent, soduim and CFLs are being phased out by a lighting technology that can deliver warm, traditional light or a cooler, more contemporary white light, all while using a fraction of the energy and with virtually zero environmental damage.

Install a Get-Lite LED Fixture 1 Time

VS

Install a Fluorescent Fixture 6 Times

WARRANTY

Get-Lite LED Lighting products carry a warranty that covers the broadest time and product range in the industry. They're warranted to burn for six hours a day, seven days a week, for 10 years. Most of the time, even under those circumstances, the majority of Get-Lite bulbs will last up to decade.

QUALITY

The production and use of LEDs requires significantly less energy than incandescent, sodium or CFLs. With long-lasting Get-Lite LED Lighting products, you'll throw away fewer lamps and give up worrying about any environmental impact from mercury or other toxic materials often present in other lighting technologies.

LONGEVITY

Just how long is 100,000 hours? It's 50 times the life of a typical incandescent bulb and 5 times the lifetime of an average CFL. In fact, if you ran one Get-Lite lamp for 6 hours per day, every day, it would last for nearly 23 years — a span of time that will see next generations to come.

Street Lighting

Get-Lite continues to raise the bar on performance and lower the total cost of ownership, delivering higher value to municipalities and facility managers. Industry-leading optical control and adjustable output for versatility and inventory management make the Street Lighting Series a perfect fit for a wide array of roadway applications, helping improve the economic value for DoTs, municipalities, or Investor Owned Utilities.

Proven, Revolutionary Technology

As the leading fully-integrated innovator of LED, components and complete lighting systems, Get-Lite is continuously advancing our state-of-the-art LED lighting products to provide energy-efficient lighting that will look and operate as expected for years to come.

Changes Everything

LED lighting – with its high quality, long life and low energy consumption –has improved our world and ended the century-old era of traditional light. But for Get-Lite, this is just the beginning. Our foundation is built on the belief that LED technology will go beyond creating good light sources to deliver vastly improved and entirely new light experiences. At Get-Lite, we call this ‘better light’ and we believe it’s our right.

Improves Our Environment

Better light makes everything look better, but it can also foster attentiveness. And better light can improve productivity, so that all get a little more done at work – all using less energy. Better light even makes us safer on the drive home. And more comfortable once we get there. Everywhere we go, better light is a step ahead, making us more productive at work. Better light changes everything, and with Get-Lite, everything’s about to change.
